### Social Media Content

Below is some sample content, please feel free to copy/paste them, write your own original content, or anything in between.

### LinkedIn/Facebook:

*[instead of FORESIGHT, try typing in “@foresight: designing a future for health” and it should give you a dropdown menu from which you can select FORESIGHT, so it will be linked to our profile page. LinkedIn can sometimes be finicky about when it will give you the dropdown menu, though, especially when copy/pasting in text]*

Who has access to means of influence over your actions and preferences?

All over the world, businesses and governments are building systems to connect data being produced by humans everywhere (with and without their consent), and they are already using it to predict and incent behaviors. There are many risks and opportunities for our health and well-being as these data systems take shape, and their emergence gives rise to important questions.

### Tweets:

If you knew that 9 #gamechangers that would affect the #futureforhealth were on the horizon, would that change how you or your organization act today? This week we examine emerging trends around privacy, data + right to self: <http://bit.ly/2ZiUKza>

9 major #gamechangers could significantly change the #futureforhealth. Its time to articulate the kind of system we really need, w/ a whole new vantage point. Join us to discuss privacy, data, + right to self this week on the blog #futureforhealth #health <http://bit.ly/2ZiUKza>

A taste of how privacy and data issues like widespread surveillance and data thieves could transform #health and well-being in this @FutureforHealth video. #FutureforHealth #Futures #GameChangers <http://bit.ly/2ZiUKza>

This @FutureforHealth video explores how the end of privacy—and the loss of the very right to a “self” in some parts of the world— could be #gamechangers for #health and well-being. #FutureforHealth #Futures <http://bit.ly/2ZiUKza>

Globally, businesses + govts are building systems to collect data produced by humans in order to predict + incent behaviors. There are risks + opportunities for our health + wellbeing as these data systems take shape. How will we respond? <http://bit.ly/2ZiUKza> #futureforhealth
