

## Holistic, innovative, culturally-rooted healthcare

<b>Idea 25</b>	Deeper investment in a more effective public health system
<b>Proposal 25c</b>	Address community social and environmental setting.
<b>Description</b>	<b>Address community social and environmental setting.</b> Connect to social sector and underlying health determinants via broad community coalitions; revise policies and align resources with community health; assure access to culturally-appropriate community health resources, either directly or via integrated services with CBOs/CHCs
<b>How will the proposed action advance equitable health and well-being?</b>	This could serve as a preventative tool for public health, with particular importance in urban settings.
<b>Is there work we can build on?</b>	
<b>Who would have to act? Who would be key partners?</b>	
<b>A few high-level action steps</b>	
<b>Other comments or guidance</b>
